Hiring Manager
[Company Name]
[City, Country]

Re: Application for [Job Title]

Dear Hiring Manager,

I am applying for the [Job Title] role at [Company Name]. I am a Senior Mobile Engineer with 7+ years of experience building iOS and Flutter apps for fintech and e-commerce. I have published 20+ apps, including a Quran app with over 1M downloads and a 4.8/5 rating. I would bring that experience of shipping stable, well-rated apps at scale to your mobile team.

At Arabia IT Company, I architect and deliver finance and e-commerce apps serving 100k+ users. Three results I am most proud of:

- **Stability:** I cut the crash rate by 35% using Firebase Crashlytics and targeted fixes, which lifted our App Store rating from 3.9 to 4.6.
- **Efficiency:** I led our migration from native iOS to Flutter, moving the team to one iOS and Android codebase and reducing development costs by 30%.
- **Quality:** At EkadSoft, I raised unit-test coverage to 85% with XCTest, reducing production defects by 20%. I have also used CI/CD pipelines to shorten release cycles from 2 weeks to 5 days.

I work in Swift, SwiftUI, UIKit and Flutter, using Clean Architecture and MVVM. I have also mentored four junior developers through code reviews, which reduced reported bugs by 20%. I care about secure, maintainable code and about tying mobile work to business goals such as retention, conversion and ratings. [Add one sentence on why this company or product appeals to you, for example its mission, its app, or a recent launch.]

I would welcome the chance to discuss how I can help [Company Name] build and scale its mobile products. My portfolio and GitHub show examples of my work, and I am available for an interview at your convenience.

Thank you for your time and consideration.

Sincerely,
Mostafa Abd El-Fatah Mohamed
